A SHORT PRACTICAL GUIDE TO OPTIMIZE YOUR NUTRITION.

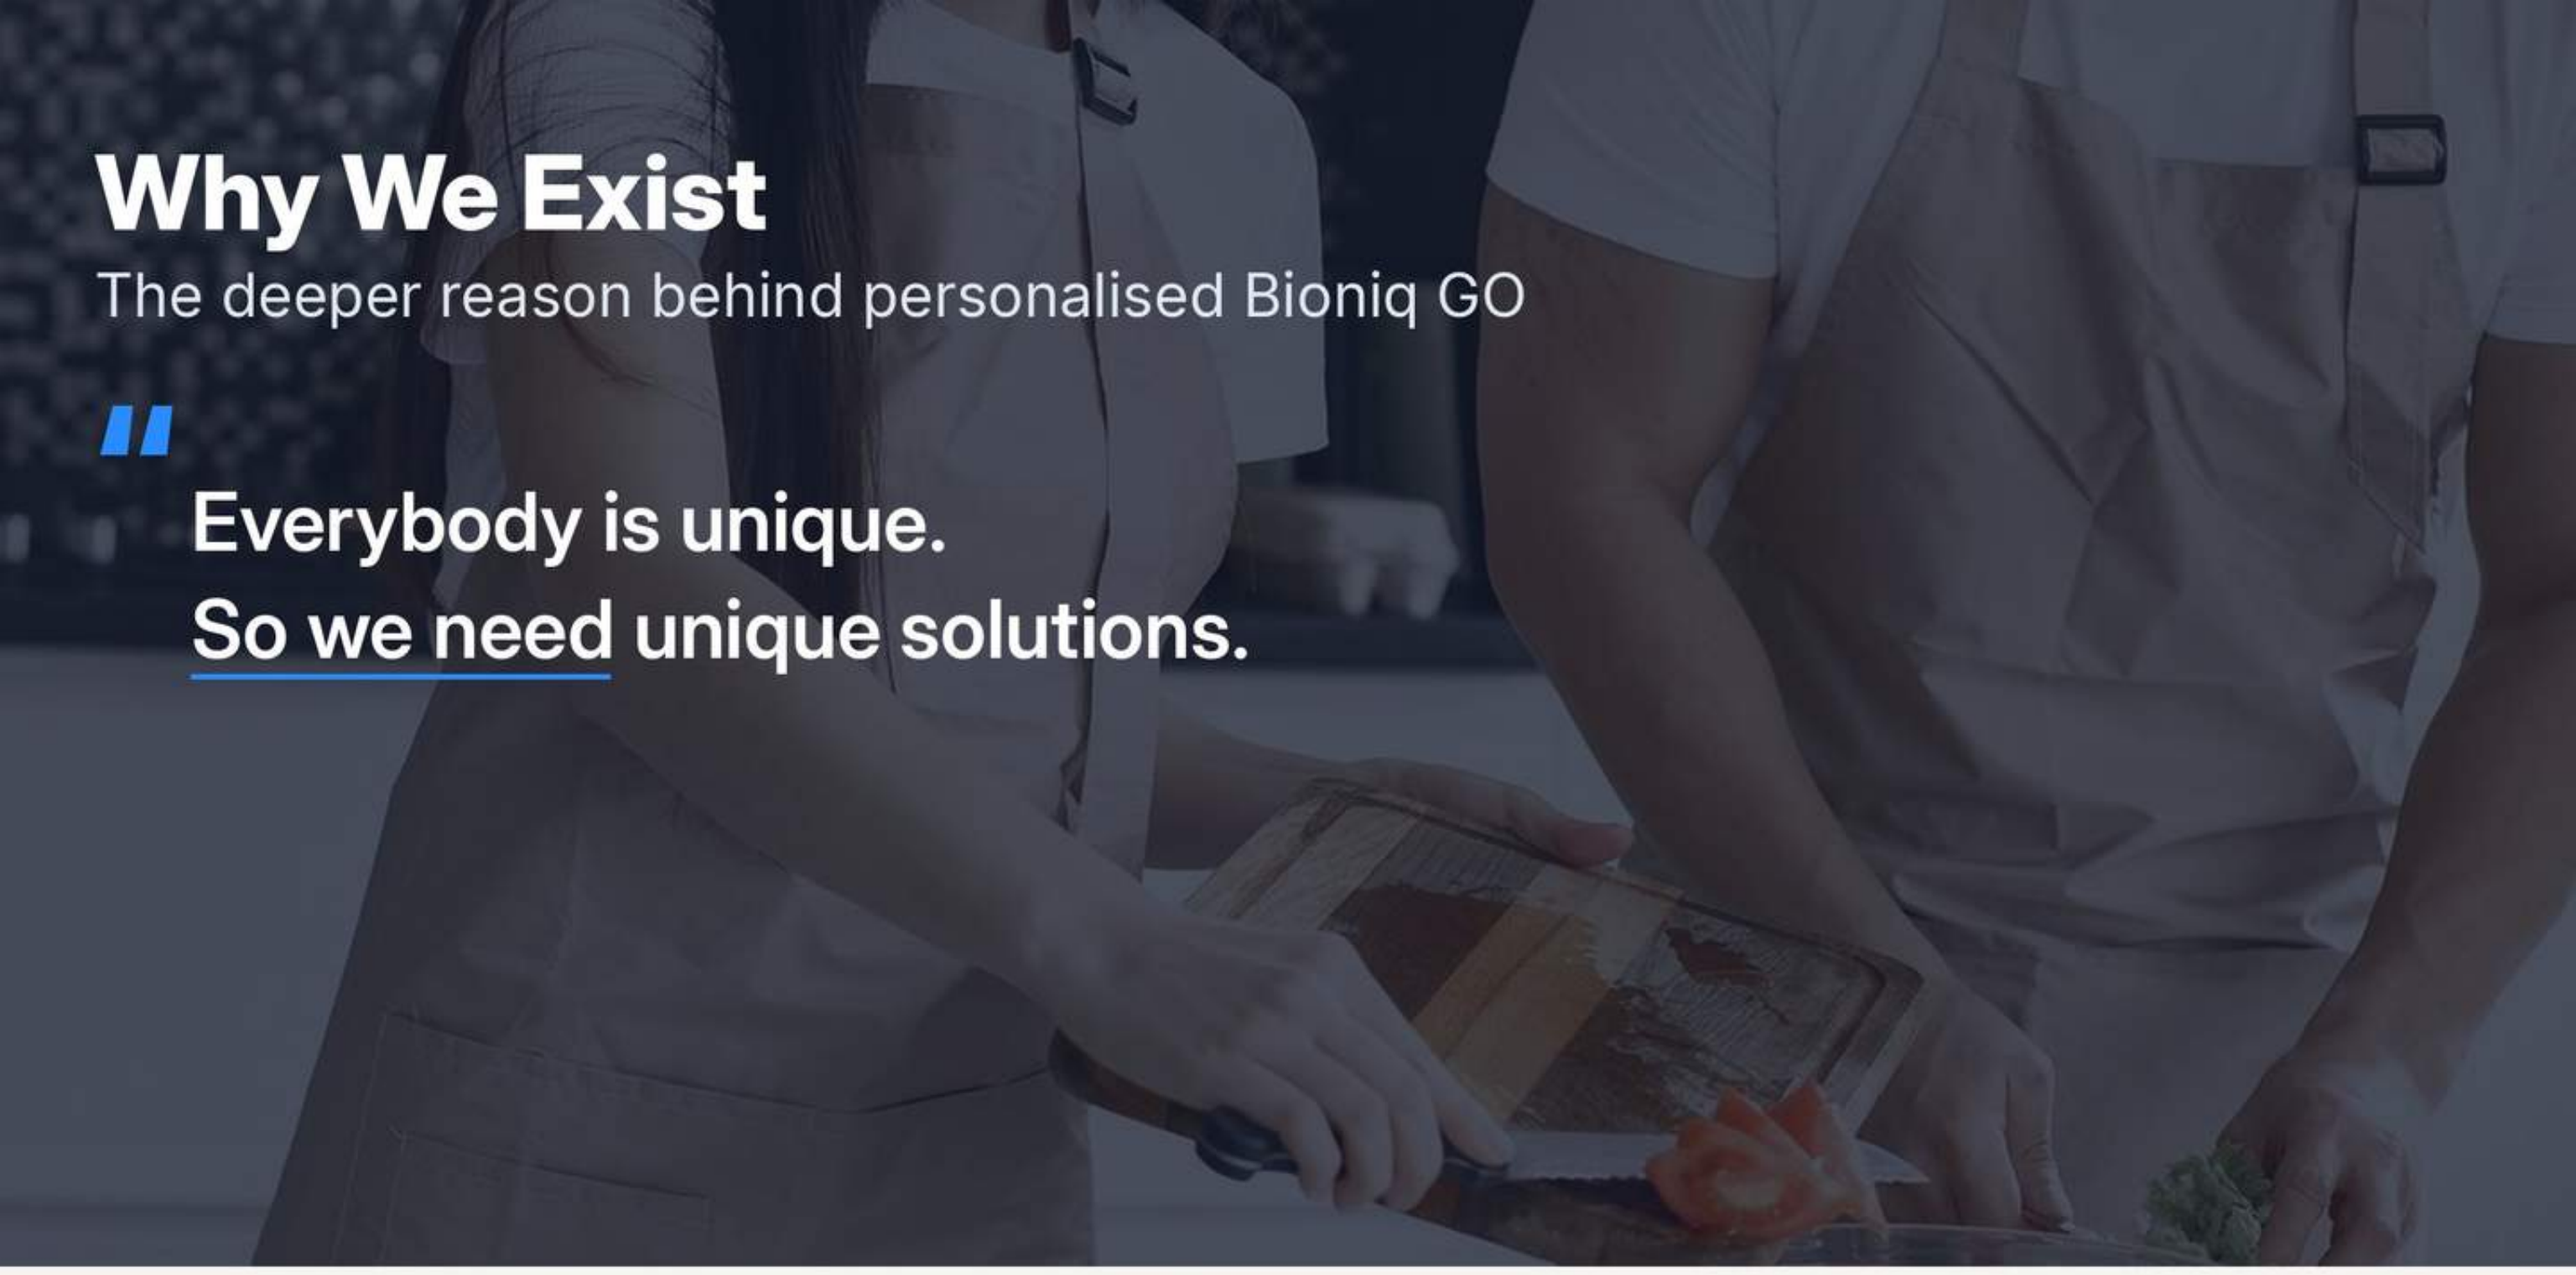

Your multivitamin was built for someone else.

BIONIQ GO
PERSONALISED SUPPLEMENTATION

How Fit Score → your personalised Bioniq GO formula actually works

DATA-DRIVEN. PERSONAL. SMARTER SPENDING.

Why We Exist

The deeper reason behind personalised Bioniq GO

> **Everybody is unique.**
> **So we need unique solutions.**

We believe one-size-fits-all supplementation is broken. It asks millions of different people to take the same pills in the same doses — and then wonders why results are average at best.

We start from a different premise: every body is different. Your genetics, lifestyle, goals, height, weight and environment create a unique set of needs. Guesswork wastes money, time and potential.

Our Why is simple:
Make personalisation practical, accessible and data-driven so every person can receive a more precise formula matched to their individual profile — with less guesswork.

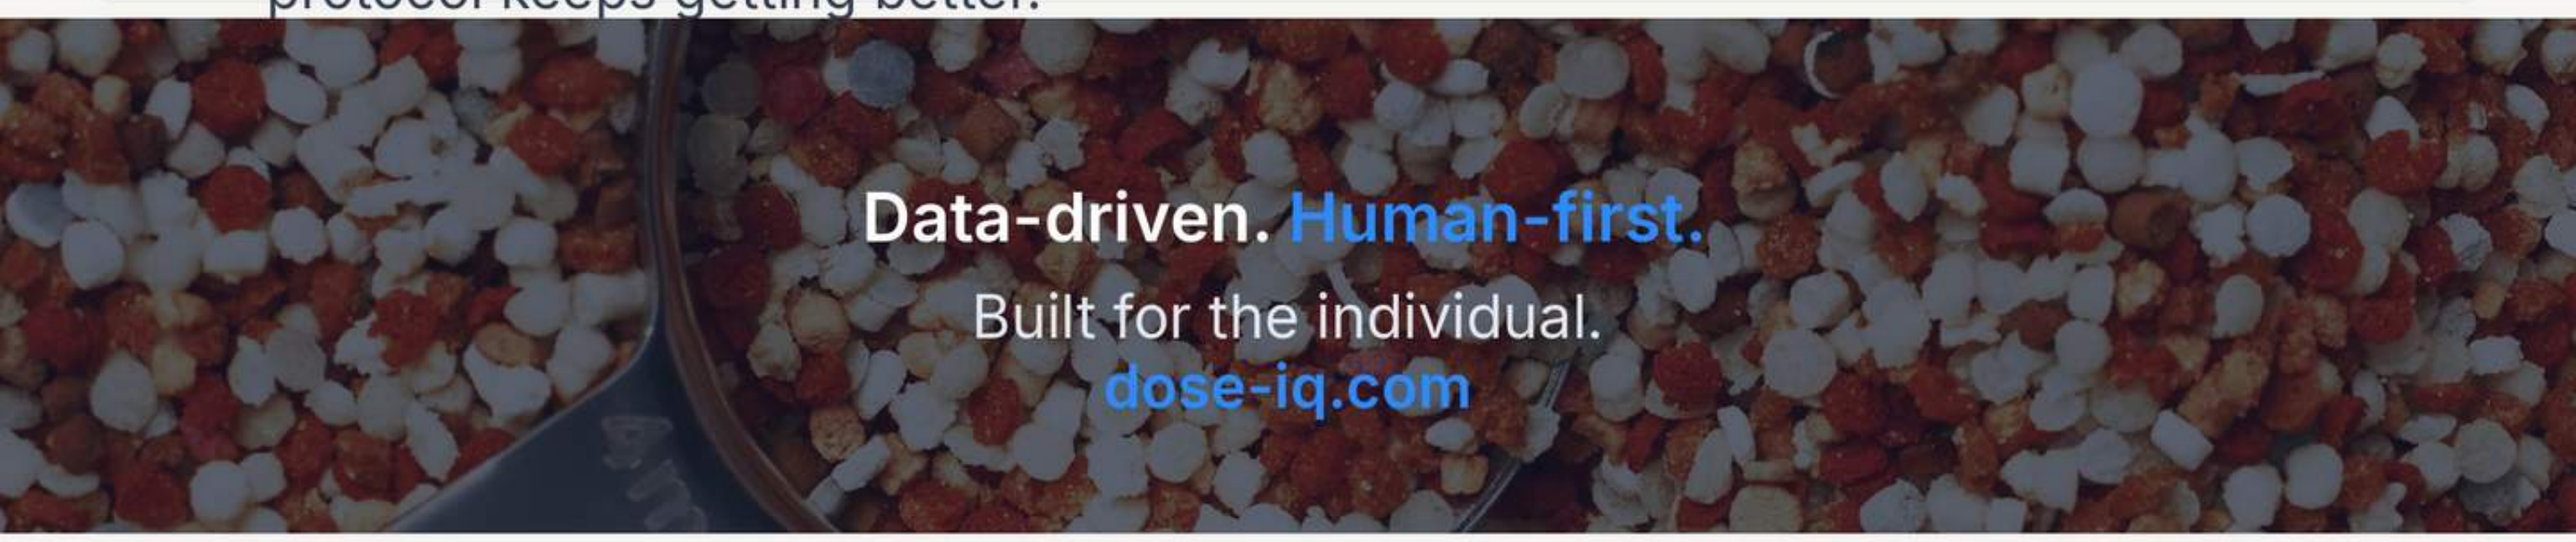

Bart Kauwenberghs
Dose-IQ
Bioniq GO · Personalised for your Fit Score · dose-iq.com

1. Precision over guesswork
We use data and science to understand individual needs and deliver the right nutrients in the right doses.

2. Convenience that creates consistency
Simple at-home testing, personalised recommendations and smart delivery — designed to fit real life.

3. Data that improves over time
Your results, habits and progress build a smarter picture over time — so your protocol keeps getting better.

The Value of Getting It Right

Why personalization is the highest-leverage optimization in nutrition

Many people pay for nutrients they may not need and miss a more targeted approach.

Personalization flips the equation:

- **Higher chance of a more relevant outcome**
- **Lower waste**
- **Less time and effort**
- **Better long-term value**

THREE REASONS IT MATTERS

1. Reduce buying nutrients that may not match your needs

Eliminate guesswork. Avoid what doesn't serve you.

2. Aim for forms and amounts better matched to your profile and data

Precision dosing based on your unique data, not averages.

3. Build consistency through daily precision

Small daily advantages create exponential long-term impact.

We don't sell supplements.

We focus on reducing guesswork — and helping you give your body a more personalised daily formula.

The Problem with One-Size-Fits-All

Most multivitamins are formulated for the “average” person—based on broad population data, not your unique biology. As a result, you may end up taking nutrients you don’t need, in amounts that don’t fit your body.

One formula. Millions of bodies.
True wellness is personal.

Generic Stack

One formula for everyone

VS

Personalised

Built around you

Potential drawbacks

- Contains nutrients you may not need
- Risk of excess or imbalances
- Doesn’t account for your lifestyle, diet or genetics
- Less targeted

Designed for you

- Based on your biology and lifestyle data
- Only the nutrients you need
- Right forms, right amounts
- More targeted support based on your data

One formula for many.
Your needs? Unique.

Science. Precision. You.
A more personal approach to daily supplementation.

Data-backed. Science-led. Human-first. Personalised nutrition for a healthier you.

The Cost of the Generic Approach

One-size-fits-all nutrition may feel convenient, but it comes at a cost—to your results, your body, and your budget.

SWISS PRECISION NUTRITION
SCIENCE · PERSONALISATION
RESULTS

GENERIC APPROACH

Broad nutrients - not tailored to you.

OVERLAPPING NUTRIENTS
Duplicate ingredients. Unnecessary extras.

HIGHER SPEND
More bottles, more waste, less value.

UNPREDICTABLE RESULTS
Generic doses may miss your unique needs.

HIGHER COST / LESS VALUE

VS

PERSONALISED FORMULA

One daily formula, matched to you.

MATCHED TO YOU
Targeted nutrients based on your data and goals.

ONE DAILY SERVING
Simple, precise, effective.

MORE TARGETED SUPPORT
Optimised approach and outcomes.

MORE TARGETED IMPACT
PRECISION NUTRITION

PRECISION NUTRITION. MEASURABLE IMPACT.

Your body is unique. Your nutrition should be too.
Targeted support today for better health tomorrow.

Ready for a formula matched to you?

DATA-INFORMED
Backed by science. Built on data.

PERSONALISED
Designed for you. Not one-size-fits-all.

SWISS QUALITY
Precision you can trust. Standards you deserve.

Why Supplements Are Essential Today

Modern lifestyles, individual goals, convenience, and precision matter. Food supplements are intended to complement a varied and balanced diet and a healthy lifestyle, not replace them.

Intensive farming and environmental factors can lead to variations in the nutrient density of soil and crops, meaning targeted supplementation can provide a convenient option to complement dietary intake.

Industrial processing and long supply chains can impact the natural nutrient profiles of foods, offering an opportunity for supplements to help fill specific nutritional gaps.

Individual differences in lifestyle, age, and physical activity mean that personal nutritional needs vary greatly, allowing supplements to support overall wellness goals.

Nutrient Decline in Modern Produce

Values reflect estimated average percentage differences versus historical baselines in published literature. For general information only.

FRUIT	Fe %	Mg %	Cu %	Zn %	Ca %	Vit C %	Vit A %

How Personalisation Works

Data-driven. Personalised. Practical.

1 Wellness Assessment

We assess lifestyle, environment, and goals to build a complete wellness picture.

2 One of 40 formulas

Based on your profile, you receive one of 40 formulas matched to your needs.

3 Daily Swiss granules

Convenient, precise daily granules for everyday support.

SUPPORTING YOUR WELLNESS GOALS

Beauty

Skin & hair care interest / everyday vitality

Cognitive

Focus & mental clarity interest

Sports

Training & recovery lifestyle

Long-Term Wellbeing

Everyday resilience & healthy habits
