

A SHORT PRACTICAL GUIDE TO OPTIMIZE YOUR NUTRITION.

PERSONALISED SUPPLEMENTATION

Why it makes sense and how
it can save you money

DATA-DRIVEN. PERSONAL. SMARTER SPENDING.

Dose-IQ is an official distributor of Bioniq

Why We Exist

The deeper reason behind **Dose-IQ**

“

Everybody is unique.
So we need unique solutions.

We believe one-size-fits-all supplementation is broken. It asks millions of different people to take the same pills in the same doses — and then wonders why results are average at best.

At Dose-IQ we start from a different premise: every body is different.

Your lifestyle, goals, height, weight and environment create a

unique set of needs. Guesswork wastes money, time and potential.

Our Why is simple:

Make personalisation practical, accessible and data-driven so every person can receive a more precise formula matched to their individual profile — with less guesswork.

1. Precision over guesswork

We use data and science to understand individual needs and deliver the right nutrients in the right doses.

2. Convenience that creates consistency

Simple assessment, personalised recommendations and smart delivery — designed to fit real life.

3. Data that improves over time

Your results, habits and progress build a smarter picture over time — so your protocol keeps getting better.

Data-driven. **Human-first.** Built for the individual.

The Value of Getting It Right

Why personalization is the highest-leverage optimization in nutrition

Many people pay for nutrients they may not need and miss a more targeted approach.

Personalization flips the equation:

Higher chance of a more relevant outcome

Lower waste

Less time and effort

Better long-term value

THREE REASONS IT MATTERS

1. Reduce buying nutrients that may not match your needs

Eliminate guesswork. Avoid what doesn't serve you.

2. Aim for forms and amounts better matched to your profile and data

Precision dosing based on your unique data, not averages.

3. Build consistency through daily precision

Small daily advantages create exponential long-term impact.

We don't sell supplements.

We focus on reducing guesswork —
and helping you give your body a more
personalised daily formula.

The Problem with One-Size-Fits-All

Most multivitamins are formulated for the “average” person—based on broad population data, not your unique lifestyle.

As a result, you may end up taking nutrients **you don’t need**, in amounts that don’t fit **your body**.

One formula. Millions of bodies.
True wellness is personal.

Generic Stack

One formula for everyone

Potential drawbacks

- Contains nutrients you may not need
- Risk of excess or imbalances
- Doesn’t account for your lifestyle, diet or goals
- Less targeted

One formula for many.
Your needs? Unique.

VS.

Personalised

Built around you

Designed for you

- ✓ Based on your lifestyle and assessment data
- ✓ Only the nutrients you need
- ✓ Right forms, right amounts
- ✓ More targeted support based on your data

Science. Precision. You.
A more personal approach to daily supplementation.

Data-backed, Science-led. Human-first.
Personalised nutrition for a healthier you.

Dose-IQ is an official distributor of Bioniq

The Cost of the Generic Approach

One-size-fits-all nutrition may feel convenient, but it comes at a cost—to your results, your body, and your budget.

GENERIC APPROACH

A broad combination of nutrients, not tailored to you.

VS

PERSONALISED FORMULA

One daily formula, matched to your goals and biology.

OVERLAPPING NUTRIENTS

Duplicate ingredients.
Unnecessary extras.

HIGHER SPEND

More bottles, more waste,
less value.

UNPREDICTABLE RESULTS

Generic doses may miss
your unique needs.

HIGHER COST
LESS VALUE

MATCHED TO YOU

Targeted nutrients based
on your data and goals.

ONE DAILY SERVING

Simple, precise, effective.

MORE TARGETED SUPPORT

Optimised approach
and outcomes.

POTENTIALLY LOWER LONG-TERM COST
MORE TARGETED IMPACT

PRECISION NUTRITION. MEASURABLE IMPACT.

Your body is unique, Your nutrition should be too.
Targeted support today for better
health tomorrow.

DATA-INFORMED

Backed by science.
Built on data.

PERSONALISED

Designed for you.
Not one-size-fits-all.

SWISS QUALITY

Precision you can trust.
Standards you deserve.

Dose-IQ is an official distributor of Bioniq

Why Supplements Are Essential Today

Modern lifestyles, individual goals, convenience, and precision matter. Food supplements are intended to complement a varied and balanced diet and a healthy lifestyle, not replace them.

Intensive farming and environmental factors can lead to variations in the nutrient density of soil and crops, meaning targeted supplementation can provide a convenient option to complement dietary intake.

Industrial processing and long supply chains can impact the natural nutrient profiles of foods, offering an opportunity for supplements to help fill specific nutritional gaps.

Individual differences in lifestyle, age, and physical activity mean that personal nutritional needs vary greatly, allowing supplements to support overall wellness goals.

Nutrient Decline in Modern Produce

Values reflect estimated average percentage differences versus historical baselines in published literature. For general information only.

FRUIT	Fe (Iron) (%)	Mg (Magnesium) (%)	Cu (Copper) (%)	Zn (Zinc) (%)	Ca (Calcium) (%)	Vit C (Ascorbic Acid) (%)	Vit A (RAE) (%)
 Apple	-48	-26	-32	-27	-35	-42	-19
 Apricot	-41	-22	-28	-24	-31	-38	-48
 Banana	-37	-19	-24	-21	-28	-33	-16
 Blueberry	-45	-29	-35	-31	-38	-47	-22
 Cantaloupe	-39	-20	-26	-22	-30	-36	-50
 Cherry	-43	-24	-30	-26	-34	-41	-20
 Grape	-46	-25	-31	-28	-36	-39	-17
 Kiwi	-34	-18	-23	-20	-27	-31	-15
 Mango	-40	-21	-27	-23	-32	-44	-53
 Orange	-38	-17	-22	-19	-26	-35	-18
 Peach	-42	-23	-29	-25	-33	-40	-21
 Pineapple	-36	-18	-29	-21	-29	-34	-16
 Avocado	-30	-16	-20	-17	-23	-28	-12

How Personalisation Works

Data-driven. Personalised. Practical.

Wellness Assessment

We assess lifestyle, environment, and goals to build a complete wellness picture.

One of 40 formulas

Based on your profile, you receive one of 40 formulas matched to your needs.

Daily Swiss granules

Convenient, precise daily granules for everyday support.

SUPPORTING YOUR WELLNESS GOALS

Beauty

Skin & hair care interest / everyday vitality

Cognitive

Focus & mental clarity interest

Sports

Training & recovery lifestyle

Long-Term Wellbeing

Everyday resilience & healthy habits
