

PERSONALISED NUTRITION

Why it makes sense
and how it can save you money

A Short Practical Guide to
Optimize Your Nutrition.

bioniq GO

The Problem with One-Size-Fits-All

Most multivitamins are formulated for an "average" person. In reality, no two people share the same diet, activity level, lifestyle or wellness goals.

As a result, many people end up taking nutrients they may not need in higher amounts, missing ones that would better support their priorities, buying multiple separate products, and spending more without clear personalisation.

Generic Stack

Personalised

Generic stack vs a single personalised formula

Personalised nutrition starts from a different premise: **your inputs matter.** structured assessment of lifestyle, diet patterns and goals can guide the selection of a more relevant formula.

The Cost of the Generic Approach

When people try to cover several wellness areas with separate products, the monthly cost can rise quickly — often without coordination between the products.

Generic approach

- Multiple bottles and daily pills
- Overlapping or missing nutrients
- Higher total monthly spend
- Harder to stay consistent

Personalised formula

- One elegant daily serving
- Matched to your goals
- Often more efficient spend
- Simple two-scoop routine

Swiss granules – designed to present nutrients in a way that mimics fruit and vegetables

Why Supplements Are **Essential** Today

Modern food often lacks adequate nutrition due to soil depletion, pollution, and industrial mass production.

1. Soil depletion

decades of intensive farming have stripped key minerals.

2. Pollution & processing

air, water and industrial methods reduce nutrient density.

3. Mass production

fruits and vegetables picked early and transported long distances lose vitamins.

Nutrient Decline in Modern Produce

Long-term scientific analyses of 25 common fruits & vegetables

Peer-reviewed food composition studies (UK 1940–2019, USDA 1950–1999 and updates through the early 2020s) document consistent reductions in key minerals and vitamins due to soil factors, high-yield breeding and rising atmospheric CO₂.

Item	Fe (Iron)	Mg (Magnesium)	Cu (Copper)	Zn (Zinc)	Ca (Calcium)	Vit C	Vit A
Apple	15-40%	10-20%	25-45%	15-30%	10-25%	10-30%	10-40%
Banana	20-45%	10-25%	30-50%	20-35%	10-25%	15-35%	10-30%
Orange	15-40%	10-20%	25-45%	15-30%	10-20%	10-30%	10-40%
Strawberry	20-45%	15-25%	30-50%	20-40%	15-30%	15-35%	10-30%
Blueberry	15-40%	10-20%	25-45%	15-35%	10-25%	10-30%	10-40%
Grape	15-35%	10-20%	25-40%	15-30%	10-20%	10-25%	10-40%
Mango	15-35%	10-20%	25-40%	15-30%	10-20%	15-30%	10-40%
Pineapple	15-40%	10-20%	25-45%	15-35%	10-20%	10-30%	10-30%
Lemon	15-35%	10-20%	25-40%	15-30%	10-20%	10-25%	15-40%
Kiwi	20-45%	15-25%	30-50%	20-40%	15-30%	15-35%	10-30%
Peach	20-45%	15-25%	30-50%	20-40%	15-30%	10-30%	10-40%
Pear	15-35%	10-20%	25-40%	15-30%	10-20%	10-25%	10-30%
Avocado	15-40%	10-20%	25-45%	15-30%	10-25%	10-30%	10-40%

Nutrient Decline in Modern Produce (continued)

Long-term scientific analyses of 25 common fruits & vegetables

Peer-reviewed food composition studies (UK 1940–2019, USDA 1950–1999 and updates through the early 2020s) document consistent reductions in key minerals and vitamins due to soil factors, high-yield breeding and rising atmospheric CO₂.

How Personalisation Works

With Bioniq GO the process is simple and data-driven:

1

Wellness Assessment

You answer questions about lifestyle, diet patterns, activity and the wellness areas that matter most to you.

2

One of 40 formulas

Based on your inputs, a formula with science-backed, bioavailable ingredients is selected to support your goals.

3

Daily Swiss granules

Just two scoops a day. A convenient format designed for consistency and absorption support.

Wellness goals the formulas can support

- **Beauty Wellness** — support for normal skin, hair and nails; normal iron absorption, metabolism and transport
- **Cognitive & Psychological Function** — normal cognitive function and normal functioning of the nervous system
- **Sports & Performance** — support for physical activity, maintenance of normal muscle function, nutritional support for an active lifestyle
- **Long-Term Wellbeing** — nutritional support as you age, maintenance of normal bones, normal iron levels and normal heart function

Take here your wellness assessment.
